

ABSTRACT OF THE INVENTION**ORAL MEDICINE DISPENSER**

- 5 The present invention provides an oral medicine dispenser for the administration of a single pre-measured dose, which dispenser comprises a body having a collapsible reservoir portion and an elongate dispensing tube portion extending from the reservoir portion, wherein the reservoir portion holds, in use, a single dose of a fluid oral medicament and the dispensing tube portion has an end cap, whereby on opening of
- 10 the end cap the collapsible reservoir portion may be manually squeezed to collapse the reservoir portion sufficiently to dispense substantially all of, or at least a major part of the medicament dose through the dispensing tube portion.
